By Mississippi Agricultural Station

Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1910 Excerpt: .or their life terminates. They all need food, the right degree of temperature and a moderate supply of moisture. Germs are found everywhere; in the air we breathe, the food we eat, the water we drink and the soil we tread upon. There are only a few disease producing or pathogenic forms, the great majority being harmless, and quantities of them actually beneficial. Previous to the time when the germ theory of disease was first made public bacteria were considered unimportant. Now, since they are closely related to many infectious diseases, they have been the main factor in the establishment of a new science, bacteriology. Only in recent years have these germs been found to be the cause of a number of most serious plant diseases. They find their entrance into the plant tissues through wounds, breathing pores, and rootlets and are as harmful in their...
