Createspace, United States, 2010. Paperback. Book Condition: New. annotated edition. 249 x 201 mm. Language: English . Brand New Book ***** Print on Demand *****.This colorful math book introduces a novel visual method for students to master their addition and subtraction skills. The creative design helps to engage student interest, while the visual layout ties into one of the current pedagogical drives in education - namely, to use visual strategies since research has shown them to be effective learning tools. These visual problems also help to develop visual skills. This volume focuses on addition and subtraction with one to three digits. The back of the book features a table of answers to help students check that they are practicing correct techniques (or it may serve as a grading key for teachers or parents). A concise description of pyramid math - including how to solve the problems - is given in the introduction. The first page of each part (part one is on addition and part two is on subtraction) is partially completed and includes annotated instructions to help students get started. There are also two completely answered, full-size examples on the front and back cover. Studying these examples and checking the answers to the first page of each part will help students become confident that they understand what to do. The interior is printed in full color with aesthetic visual patterns. The 8 x 10 pages are nearly the same size as standard school papers that students are used to working with. With 15 problems per page, there are 540 exercises all together. Each problem includes its own dedicated workspace. Both the answers and workspaces are numbered from 1 thru 15 for easy correspondence. The workspaces encourage students to show their work, and the symmetrical structure of the workspaces shows...
