

Analog Electronics (higher vocational education teaching Eleventh Five Year Plan) Vocational electromechanical materials series

By QIU LI FANG

paperback. Book Condition: New. Ship out in 2 business day, And Fast shipping, Free Tracking number will be provided after the shipment. Pages Number: 169 Publisher: Science Pub. Date :2008-07-01 version 1. 8 book chapters. focuses on: the basic principles of semiconductor devices and use; basic amplifier circuits. working status and performance indicators; power amplifier circuit of classification. characteristics and applications; differential amplifier circuit and an integrated operational amplifier composition and performance indicators; negative feedback amplifier circuit of the classification and application examples; integrated op-amp linear and nonlinear applications; waveform generator circuit; DC power supply. This book covers the entire contents of analog electronics. with a summary of each chapter and exercises. Book to develop students ability to apply technology as the main line. reflecting the vocational characteristics; arrangements in the organization and preparation of the content on the difficult and easy. simple and easy to understand. This book is a higher vocational education Eleventh Five-Year Plan materials. as higher vocational institutions. colleges. adult colleges and undergraduate institutions of secondary vocational and technical colleges organized by the electrical. electronics. communications. computers. automation and mechanical and electrical professional Analog Electronics. Electronic Technology (analog

Reviews

It is an awesome publication which i actually have ever read through. it had been writtern really properly and valuable. I found out this book from my i and dad recommended this pdf to discover.

-- **Doyle Schmeler**

This book is definitely not simple to begin on studying but quite fun to see. I actually have read and that i am sure that i will gonna read through yet again once again in the foreseeable future. It is extremely difficult to leave it before concluding, once you begin to read the book.
