

Analyse Des Doctrines Linguistiques de G. de Humboldt

Filesize: 3.06 MB

Reviews

It in a of the most popular pdf. It really is full of knowledge and wisdom Its been developed in an exceptionally easy way and it is just right after i finished reading through this publication by which really altered me, alter the way in my opinion.

ANALYSE DES DOCTRINES LINGUISTIQUES DE G. DE HUMBOLDT

DOWNLOAD

RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 54 pages. Original publisher: Pasadena, Calif. : Jet Propulsion Laboratory, California Institute of Technology, 1984 OCLC Number: (OCoLC)696129323 Excerpt: . . . SECTION II COMPUTER MODEL The computer model developed to simulate the concentrator is based on three-dimensional ray tracing. The law of reflection is formulated as a set of vector equations involving the incident rays, reflected rays, and the normal to the concentrator surface at the reflection points. The reflected ray direction is computed for a specified source location, a particular optical surface, and a specified reflection point on the concentrator. Iterating the computation for an array of reflection points and normal vectors suitably describing the surface produces an array of reflected rays. The points of intersection of these rays with the receiving surface forms a model of the optical image. The coordinates of the intersection points are calculated explicitly, and therefore may be analyzed in the same way that experimental data are analyzed. The number of reflected rays per unit area for prescribed small areas of the image represents the intensity in that area. For intercept factor calculations, the image plane is divided into concentric apertures centered about the optical axis. In the interest of having a methodical approach to the analysis, the modelling proceeded in a sequence of three distinct steps. The first modelled a perfect geometric concentrator free from surface irregularity and illuminated by a point source. The second introduced variable degrees of surface irregularity into the system, and the third integrated the results of the first two and used as a source an array of points that simulate the finite solar disk. The vector nature of the three-dimensional reflection problem is illustrated in Figure 2-1 where two reflection points are shown. The rays...
